Iga 775 P4	3.4/800 fsb		\$1,174	\$1,189	\$1,207	\$1,199	\$1,205

Sempron vs. Athlon

The Semprons have some cache disabled and also have a lower HT speed. Also, some older Semprons do not support 64-bit, so if that is important for you, watch out for those.

50% Deposit at time of sale.

Warranty Information:

PC Whizdom's discretion for 1 year from the date of purchase provided the defect occurred during normal use. The warranty may be null & void if the case is opened by anyone other than PC Whizdom.

After the first year current labor charges will apply for any factory warranty.

SOFTWARE is warranted under the manufacturer's warranty and PC Whizdom may not be

held liable for software problems except that the operating system software functions as it

was intended at the date of purchase. Any software restoration that may be required after the

purchase may be billed at PC Whizdom's current labor rates.

Prices subject to change without notice.
